

Marcus Hudnell

Frontend Engineer

Pacific Time (PT) • 561-389-6421 • hudnelldev@gmail.com • github.com/hudnellmarcus • linkedin.com/in/marcus-hudnell

Frontend engineer with experience building and maintaining customer-facing production web applications, primarily in contract-based environments. Strong in modern React and Next.js development, with a focus on clean UI systems and practical integration with backend services.

Experience

Software Engineer (Contract) — Field Operations Platform

Express • MongoDB • Next.js • TypeScript • Session Auth • RBAC

- Designed and implemented server-enforced workflow systems coordinating multi-step field operations, including treatment completion gates, role-based permissions, and automated scheduling logic to prevent invalid state transitions in production.
- Built, deployed, and actively operate a live Express/MongoDB/Next.js server, handling bug fixes, feature additions, and production stability for real operational users.
- Implemented session-based authentication and role-based access control to ensure only authorized actions could advance operational workflows.
- Collaborated directly with business stakeholders to translate real-world operational rules into enforceable backend logic and UI flows.

Frontend Engineer (Contract) — Rewardsbot

React • Next.js • TypeScript • API Integrations (private product)

- Owned and maintained the frontend for a production, multi-tenant application used by customers, focusing on reliability and clear user flows.
- Integrated frontend components with backend APIs and authentication flows, coordinating closely with backend services.
- Iterated on UI and feature enhancements based on real customer usage and operational feedback.

Frontend Engineer (Contract) — New Wave Therapy

Next.js • Sanity CMS • SEO • <https://newwavetherapy.com>

- Built and maintained a production marketing site backed by a structured Sanity CMS, supporting non-technical content editors.
- Designed content models and queries to support flexible page composition and ongoing site updates.
- Implemented SEO-focused layouts and organic traffic foundations for a public-facing healthcare site.

Frontend Engineer (Contract) — Simpson Street

React • Vite • Tailwind • <https://simpsonst.com>

- Delivered and maintained a frontend-only production application with a strong emphasis on performance, responsiveness, and design consistency.
- Built reusable UI components and layout systems to support rapid iteration and design updates.
- Collaborated with designers and stakeholders to translate visual designs into accessible, production-ready interfaces.

Frontend Engineer (Contract) — IAM21

React • Next.js • <https://iam21.com>

- Built and shipped a public-facing site focused on clean UI presentation and responsive layout.
 - Emphasized visual polish, interaction detail, and performance across devices.
-

Core Skills

Frontend: React, Next.js, TypeScript, Vite, Tailwind CSS

Backend: Express, MongoDB, session-based authentication, RBAC

SEO & Performance: Organic traffic foundations, metadata, site structure

Tooling: Git, CI/CD, ESLint, Storybook
