www.marcushudnell.com

Full-Stack Software Engineer focused on building scalable web applications and reusable component libraries. Experienced in implementing modern front-end frameworks with an emphasis on code quality and maintainable architecture. Strong background in cross-functional collaboration and technical implementation.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React, HTML5, CSS3, TailwindCSS

Testing: Mocha, Chai, Jest

Backend: Node.js, Express

Database: PostgreSQL, MongoDB

Tools: Git, Docker, Firebase, AWS

CMS: Webflow, Sanity

PROFESSIONAL EXPERIENCE

IAM21 Productions

Frontend Developer / November 2024 - April 2025

- Developed complex web application using Webflow CMS, implementing advanced animations through custom JavaScript, jQuery, and CSS to create sophisticated interactive experiences
- Architected scalable data structures using Webflow collections to mimic backend functionality, enabling efficient content management and template reusability
- Collaborated directly with CEO/Founder and design team to translate strategic vision into technical implementation, ensuring alignment with brand goals
- Implemented responsive design principles to ensure optimal performance across all devices while maintaining visual integrity of complex animations

Simpson Street

Frontend Developer / January 2024 — June 2024

- Transformed high-fidelity brand designs into a pixel-perfect responsive website with GoDaddy integration
- Optimized site performance and load times while preserving rich media content and visual integrity

- Ensured cross-browser compatibility and responsive design across all device breakpoints
- Created maintainable codebase with comprehensive documentation for future scalability

LIQUID Rewards

Frontend Developer / November 2023 — January 2024

- Built functional authentication system and user dashboard simulating real-world financial workflows
- Engineered custom JavaScript solutions for API response simulation and dynamic data visualization
- Implemented enterprise-level state management patterns ready for production integration
- Developed modular component architecture showcasing scalable, maintainable code practices

PROJECTS

IAM21 Productions | *Webflow, JavaScript, jQuery, CSS, CMS*

Built sophisticated web application with dynamic UIs and advanced animations. Engineered Webflow collections mimicking backend functionality for content management. Implemented responsive design principles maintaining complex animation integrity across all devices.

Simpson St. | *React, TailwindCSS, TypeScript* | GitHub: github.com/hudnellmarcus/Simpson_Street

Transformed brand design into pixel-perfect responsive website with GoDaddy integration. Created custom components reflecting brand guidelines across all breakpoints. Implemented optimization techniques ensuring fast load times despite rich media content.

LIQUID Rewards | *React, TypeScript, RESTful APIs, TailwindCSS* | GitHub:

github.com/hudnellmarcus/liquid-demo

Built functional authentication system and user dashboard simulating financial workflows. Engineered JavaScript solutions for API simulation and data visualization. Created modular architecture showcasing enterprise-level code organization and scalability.

EDUCATION

Software Engineering Immersive Certificate

General Assembly

Intensive 450+ hour program focused on full-stack development, including JavaScript, React, Node.js, and testing methodologies

Bachelor of Arts in Geography

Colgate University
